

EXECUTIVE SUMMARY

Problem

Lack of Awareness - 71% of the girls are unaware of menstruation when it first occurs and also lack knowledge of the products necessary for proper menstrual hygiene.

Stigma around Menstruation - Myths and taboos have lowered self-esteem of menstruators leading to ignorance of menstruation-related problems.

Lack of Access to Menstrual Products - High cost of sanitary napkins (Rs.170/month i.e. Rs. 2040/yr) and unnecessary secrecy surrounding periods force underprivileged women to use unfit cloth like rags.

Health Hazard - Disposable pads contain dioxin which can cause cancer, reproductive & hormonal problems, skin darkening and irritation.

Environmental Threat - Most pads are for single use and end up in water bodies and landfills, taking 800 years to decompose.

Ignorance of LGBTQ+ - All menstruators are not women and inclusion of LGBTQ+ community remains a big challenge.

Girls are unaware of menstruation before their first period

Women don't have access to sanitary pads in India

Schoolgirls do NOT consider periods "normal"

Girls drop out annually due to lack of sanitary pads

Project Crimson - Our Solution

Project Crimson is a student led initiative to manufacture and make accessible **low cost, reusable sanitary napkins**, and to provide employment to create financially independent female entrepreneurs.

20,000+ Women Impacted

Rs. 14,40,000+ Revenue Generated

25,000+ Hours Devoted

20+ Collaborations

50+ Members

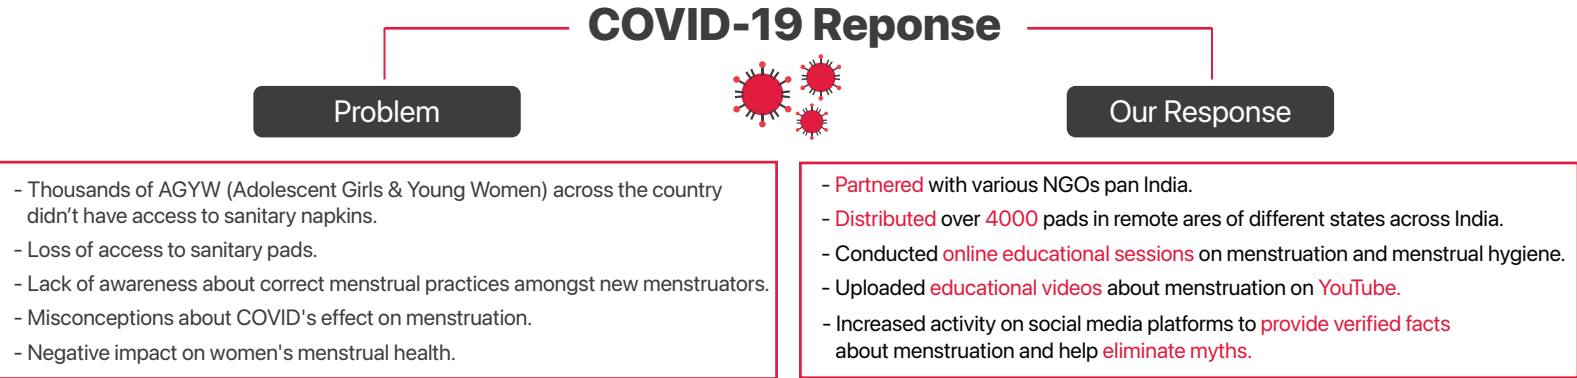

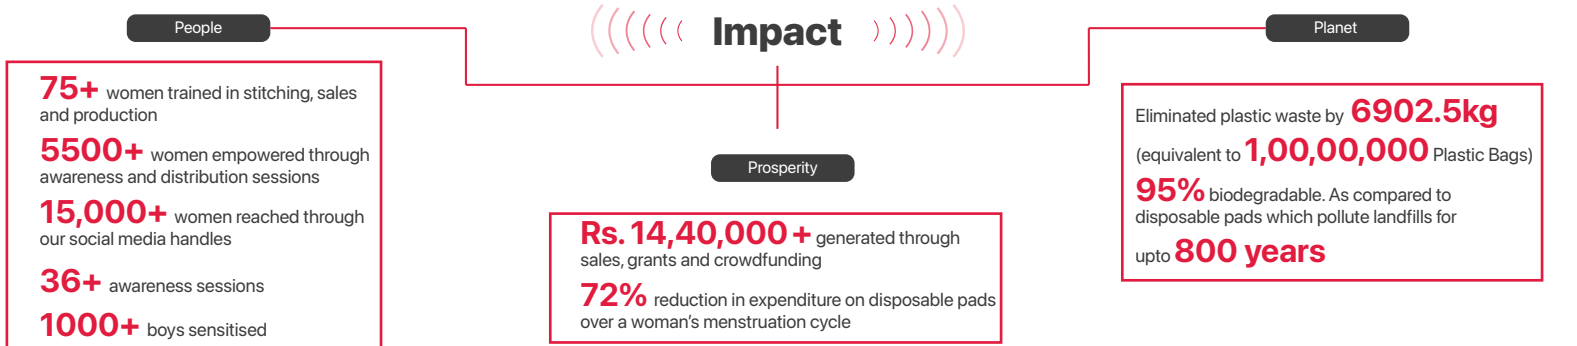

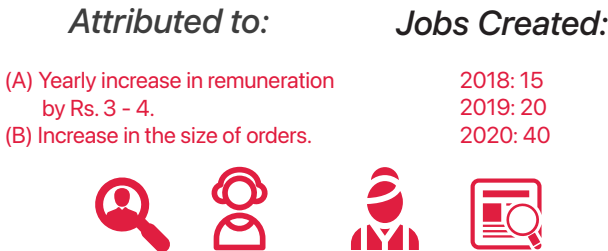

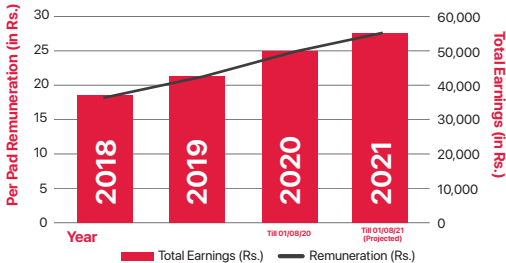

4-Fold Model

1. Provide a livelihood to women and support them towards **financial independence**.
2. To **create a new market** for an eco-friendly, economical alternative to disposable sanitary napkins with an aim to **reduce menstrual waste**.
3. **Change society's perception** of menstruation through awareness sessions for both boys and girls.
4. Promote safe and hygienic menstrual habits among women in their everyday lives by making sanitary pads **widely available** to rural and urban women.
